

Article 2

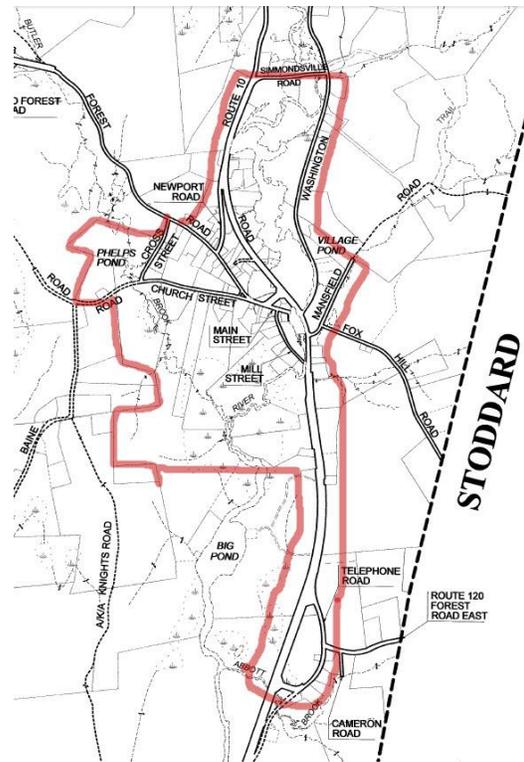

Are you in favor for enlarging the Village District Zone of Marlow by Extending it beyond it's current limitations so that it will include the area bounded by the Symondsville Road on the north, the Washington pond Road on the east, encompassing all of the Telephone Road on the south, and both sides of Route 10 back to the village?

(The intent of this article is to provide a larger area for desirable growth and development, both residential and commercial, in the most accessible sections of town. Village District Zone designation allows for a more concentrated siting of businesses and homes in close proximity. Generally subdivision of property down to one acre lots is permitted in the Village District Zone.)

Existing Village District Zone

Proposed Village District Zone

Village District Zone encompasses 300 feet from Route 10, or the entirety of any lot touching route 10, whichever is larger. The image shown may not take into account lots that have been subdivided since these maps were drawn. In the case where a lot shown on this map has been subdivided, only the lots touching Route 10, or within 300 feet of Route 10 will be included in the new Village District Zone.
