Subject: Eversource Prepares for Winter Storm Season

Good Afternoon,

Please see the release below regarding preparation tips for the upcoming winter storm season. Feel free to share this on municipal news pages, social media channels, and wherever else you would like to keep residents informed and up to date on the latest news from Eversource. As always, contact me with any questions, concerns, or follow up via cell or email.

Sincerely,

Connor

NEWS RELEASE

Eversource Prepares for Winter Storm Season
Energy company provides preparation tips for customers

MANCHESTER, N.H. (Nov. 30, 2021) – With the Atlantic hurricane season officially ending today and the winter storm season just ahead, Eversource is preparing and encouraging customers to do the same. The energy company works year-round maintaining and upgrading electric lines and equipment, so it can better withstand New England’s sometimes fierce and often unpredictable weather. Eversource invests tens of millions of dollars every year to strengthen the delivery system – installing stronger poles and thicker “tree wire,” adding smart switches and smart fuses to the system that help to automatically restore power in certain situations, and installing optical ground wire that enhances communications between the electric system and the company’s operations facilities.

“Typically, light, fluffy snow doesn’t cause significant problems for the electric system. It’s the heavy, wet snow, freezing rain or ice that can weigh down tree limbs and branches bringing them down onto our electric lines, causing power outages,” said Eversource President of New Hampshire Operations Doug Foley. “We can’t prevent storms from happening, but we know our customers depend on us to restore power as quickly and safely as possible when the power does go out and we take that responsibility seriously. We monitor the weather forecast closely every day and are always prepared to respond to any damage or outages a storm may cause – whenever a storm hits - and we want our customers to be ready too.”

Eversource encourages customers to assemble or replenish a well-stocked storm kit. Some essentials that should be included are:

- First aid supplies
- Basic tools
- Portable radio
- Flashlight and batteries
- Prescriptions
- Bottled water, one gallon per person for every day you could be without power
- List of emergency phone numbers
- Nonperishable foods, such as peanut butter and jelly, tuna and other canned goods
- Pet food and supplies

The energy company also recommends fully charging cell phones and electronic devices before a storm hits so if the power does go out, customers can get outage information and updates from the company website and social media pages – Eversource.com, [Twitter](#), [Facebook](#), [Instagram](#), and [LinkedIn](#).
